Lab Prerequisites

Following prerequisites and setup must be complete for successful completion of the exercise:

- You must be connected to the internet and have Microsoft Office installed.
- **Signup for Power BI:** Go to <http://aka.ms/pbidiadtraining> and sign up for Power BI with a business email address. If you cannot sign up for Power BI, let the instructor know. If you have an existing account, please use the same url as above.
- At minimum, a computer with 2-cores and 4GB RAM running one of the following versions of Windows: Windows 8 / Windows Server 2008 R2, or later.
- If you choose to use Internet Explorer it will require version 10 or greater, you can also use Edge or Chrome.
- Verify if you have 32-bit or 64-bit operating system to decide if you need to install the 32-bit or 64-bit applications.
 - Search for computer on your PC, right click properties for your computer.
 - You will be able to identify if your operating system is 64 or 32 bit as shown below.

- **Download the Power BI Content:** Create a folder called **DIAD** on the C drive of your local machine. Copy all contents from the folder called **Dashboard in a Day Assets** to the **DIAD** folder you just created (C:\DIAD).
- **Download and install Power BI Desktop** using any one of the options listed below:
 - If you have Windows 10, use Microsoft App Store to download and install Power BI Desktop app.
 - Download and install Microsoft Power BI Desktop from <http://www.microsoft.com/en-us/download/details.aspx?id=45331>.
 - If you already have Power BI Desktop installed ensure you have the **latest version** of Power BI downloaded.
- **Download and install Power BI Mobile App on your mobile device**
 - If you are using an Apple product download and install the Microsoft Power BI Mobile app from the Apple store or this link <https://apps.apple.com/us/app/microsoft-power-bi/id929738808>
 - If you are using an Android product download and install the Microsoft Power BI Mobile app from the Google Play store or this link <https://play.google.com/store/apps/details?id=com.microsoft.powerbim>

Document Structure

This document is lab 05 of 05 labs in total.

If you are joining the DIAD at this point or were unable to complete previous labs, please start this lab with the provided: “Lab 4 Solution.pbix” file you can find in the Reports folder.

At the end of this lab you will have learned how to share your dashboard and collaborate with other users. You will also have learned how to access your dashboard on your mobile device.

The document flow is in a table format. On the left panel are steps the user needs to follow and in the right panel are screenshots to provide a visual aid for the users. In the screenshots, sections are highlighted with red boxes to highlight the action/area user needs to focus on.

NOTE: This lab is using real anonymized data and is provided by ObviEnce LLC. Visit their site to learn about their services: www.obvience.com.

Power BI Service – Collaboration and Distribution

You have built the dashboard and ready to get feedback and collaborate with your team members.

- 1. Sign into PowerBI.com to access your workspace
- 2. From the left panel, select
- Workspaces.**
- 3. Select the **ellipsis** next to **DIAD_<youremailaddress>.**
- 4. Select **Workspace access.**
- 5. Access dialog opens. You can **enter the email addresses** of the colleagues you want to collaborate with.
- Each user can belong to one of 3 **roles**:

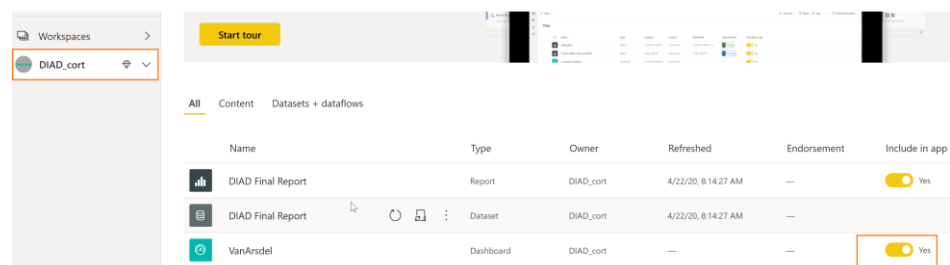

Contributor	Add/edit/delete content within workspace.
Member	Everything a Contributor can do. Re-share. Publish & update Apps.
Admin	Everything a member can do. Can change/delete workspace. Can add Admins.

- 6. Select the **role** and select **Add.**
- 7. Once you finish adding your colleagues and select **Close.**
- Note:** If you don't have a colleague's email please close without submission.
- Note:** you can ask your colleague to login and access the workspace.

Now let's share the content we created with the report viewers/consumers. We need to publish an app to do this. An App can include multiple dashboards and reports.

- 8. In the left panel select **DIAD_<youremailaddress> workspace.**
- 9. In the **Dashboard** page, notice there is an option **INCLUDED IN APP**, to include the Dashboard in the App.

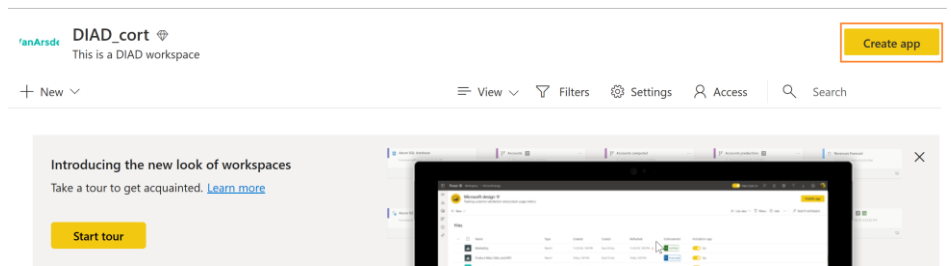

10. Navigate to **Reports** page.

11. Notice there is an option **INCLUDED IN APP** to include the Reports in the App. If you have reports and dashboards in your workspace that you do not want to share with report viewers, you can uncheck this box. When you are working with multiple reports you can decide which to include in the app. In our case we would like to include the 2 reports, so we will leave the boxes checked.

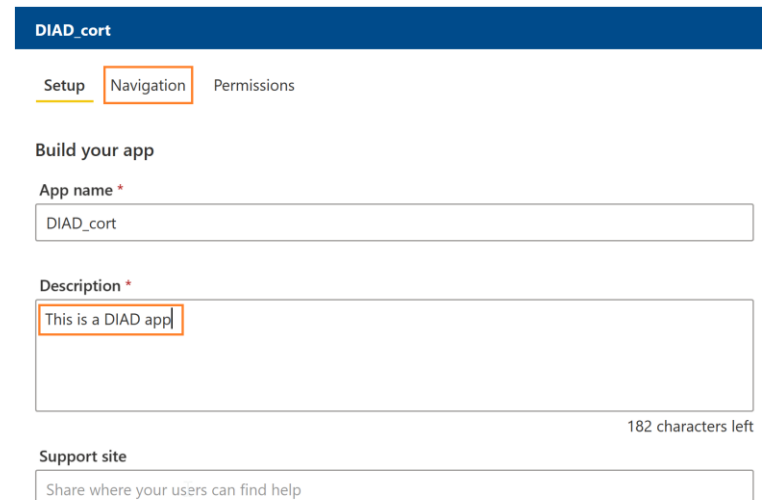

12. In the left panel select **DIAD_<youremailaddress> workspace**.

13. In the upper right corner select the **Create app** button.

14. In the **Setup** page, enter **"This is DIAD app"** in the description field.

15. Click on **Navigation** tab.

16. From the Navigation menu select **VanArsdel (dashboard)**.

When a user accesses the DIAD app, we want them to land on the VanArsdel dashboard.

17. Navigate to **Permissions** page.

When you publish an app that has large distribution, it might take a little while to process. Typically, the content will be available within 5-10 minutes, but it can take up to one day.

Publish Cancel

<p>You can copy the link to the App after it's been successfully published and share it with the individuals via email. But a better way for report viewers to consume the App is by logging onto Power BI Service and registering the App. Let's impersonate a report viewer.</p> <p>22. From the left menu, select Apps.</p> <p>23. Select Get Apps.</p>	
<p>24. AppSource dialog opens. You will notice DIAD_<youremailaddress> App listed. Select the newly added app.</p> <p>This is a one-time registration. Going forward when you select Apps in the left panel, you will see DIAD_<youremailaddress> app in the list of Apps you have registered you can click on Get it now.</p>
